ABOUT J-TEQ

J-TEQ EMS are a successful and highly regarded provider for Surface Mount & Conventional PCB Assembly and Product Assembly. We hold ISO9001 and ISO13485 approvals and serve markets such as Medical, Security, Scientific, Data Communications and Commercial to name a few.

We have invested heavily in our resources here at J-TEQ, so with leading edge technology equipment, and an experienced, dedicated team, we can offer a quality service to our customers.

We are looking for people to join our team, who can bring an enthusiasm and commitment and enjoy working as part of the J-TEQ family.

JOB PURPOSE:

The primary role for this position will involve carrying out functional testing of assembled PCBs and finished product. The role will also include other manual build assembly work and production tasks as required.

MAIN DUTIES:

- Carry out Manufacturing Test of assembled PCBs following written test instructions, with a high level of attention to detail, using different computer applications, programming tools and test fixtures.
- Identify any trends of manufacturing defects and work with colleagues to highlight and resolve these.
- Assemble PCBs into finished product following high level assembly drawings.
- Mechanical assembly of products to final and sub-assembly levels.

PERSON SPECIFICATION:

- Previous experience working in a manufacturing test environment.
- Experience operating functional or in-circuit test fixtures.
- Computer literate and comfortable using different Windows environments.
- Experience using programming cables/hardware/software would be advantageous.
- Experience using bench power supplies would be advantageous.
- Experience of debug activities and investigation/logging of test fails would be advantageous.
- Excellent attentional to detail.
- Good listener and team player.
- Methodical, enthusiastic, organised and able to work on own initiative.
- Have a flexible approach to working arrangements. Out of hours working may be required to cover the needs of the business in certain situations.
